

Case Study

Plas Bod Llwyd Residential Care Home

Managed by Clwyd Alyn and part of the Pennaf Group George Jones were recruited by PenCartref, their in-house DLO, to redecorate Plas Bod Llwyd Residential Care home.

Plas Bod Llwyd is a 27 bedded residential care home, in New-bridge providing short-term, long term and respite care for a range of patients.

For this particular project, all communal areas throughout this important specialist care hub were prepared and decorated. Areas including; dining room, corridors & stairwells within Plas Bod Llwyd were subject to a full redecoration, using the tried, tested and traditional, brush and roller method.

High-traffic areas were only redecorated when not in use and under the close supervision. Whilst all high-level access work was completed using a mobile tower.

Working with our Contact Partners Dulux/Akzonobel, George Jones produced a Dementia Friendly Specification to create a calming, peaceful environment. Using water-based paints, areas were undertaken based around the needs of the residents.

The programme was delivered by George Jones' team of directly employed and highly trained operatives. Each member of team holding the relevant DBS checks and training required for working in this environment previously.

Operatives deployed for this project holding on average over 20 year's worth of experience of working in residential shelters, supported & HMO's throughout the North-West.

The result is as shown a vibrant, calming and tranquil transformation delivered by George Jones' highly trained and experienced team.

Project Key Aspects

- ✓ Dementia friendly specification created in tandem with supplier to create a brighter environment
- ✓ Accommodating to residents using water based paints throughout to limit odours
- ✓ Delivered by George Jones' directly employed and highly trained operatives
- ✓ Flexible programme tailored around the needs of the residents and a 24/7 working home
- ✓ DBS checked operatives deployed with previous experience of working in similar environments
